PROFESSIONAL SUMMARY

Full-stack Junior Software Developer with 2+ years of professional experience shipping production systems for the hospitality and hotel industry, currently supporting an app used by roughly 700 end users across ~250 client properties. Delivered a BIR-compliant Compliance Accounting System (CAS) integration, cut a core reporting query from 15 seconds to 500ms through SQL and stored-procedure optimization, and built a background microservice (Xenia Online) syncing on-premise and cloud data via DynamoDB and S3. Works daily with AI-assisted development tools (Codex, ChatGPT, Claude) to speed up implementation while keeping logic and architecture decisions self-directed.

WORK EXPERIENCE

Junior Software Developer — Servo IT Solutions — Angeles City, Pampanga

May 2025 – Present

- Built Xenia Online, a background microservice syncing reservation data between on-premise and cloud servers to support guest pre-arrival and online check-in, pulling and pushing data through DynamoDB via HTTP APIs in C#/.NET.
- Implemented an image-upload service in Node.js and RESTful APIs to store user-submitted files in AWS S3 as part of the same sync pipeline.
- Develop and optimize backend APIs (C#/.NET, PHP, MySQL) as part of a 9-developer web app team within a 25-developer engineering organization spanning 5 teams.
- Refactor React/TypeScript UI components for consistency and maintainability, and reduce load time and technical debt through targeted backend refactoring.
- Participate in Agile sprint planning, code reviews, and cross-team collaboration.
- Use AI coding assistants (Codex, ChatGPT, Claude) as part of daily workflow to accelerate implementation, with logic and design decisions remaining self-directed rather than AI-dictated.

Associate Software Developer — Servo IT Solutions — Angeles City, Pampanga

Jun 2024 – May 2025

- Reduced a core Banquet & Sales Management System report query from 15 seconds to ~500ms (~97% faster) by correcting SQL joins, introducing temporary tables, and converting the query into a stored procedure.
- Delivered the Compliance Accounting System (CAS) integration (PHP, JavaScript, jQuery) connecting the web app to the Accounting System for BIR tax compliance, generating Sales Journal Entries (SJE), Receipt Journal Entries (RJE), and receipts used in live hotel-industry business operations across roughly 250 client properties and ~700 users.
- Built responsive, reusable front-end components (HTML, CSS, JavaScript) for the Banquet System UI.

Software Developer Intern — Servo IT Solutions — Angeles City, Pampanga

Feb 2024 – May 2024

- Completed final-year OJT/internship and was retained as a full-time hire based on performance and demonstrated potential.
- Assisted in building on-premise backend services, contributing to security and access-speed improvements.
- Supported performance debugging and testing for the Banquet System.
- Set up a Git-based CI/CD pipeline, reducing deployment steps by 50%.
- Implemented QR code features and Chart.js analytics used in the Banquet System reporting workflow.

TECHNICAL SKILLS

Languages & Frameworks: PHP, JavaScript, TypeScript, C#, .NET, HTML5, CSS3, jQuery, Node.js, React.js

Cloud & Data Sync: AWS S3, DynamoDB, HTTP/REST API integration, on-premise ↔ cloud data synchronization

Database: MySQL (query optimization, joins, temporary tables, stored procedures), NoSQL (DynamoDB)

Tools & Practices: Git, GitHub, GitHub Actions (CI/CD), Agile/Scrum, Postman, Chart.js, AJAX, Bootstrap

AI-Assisted Development: Codex, ChatGPT, Claude — daily use for implementation speed with self-directed logic and architecture

OS: Windows

EDUCATION

Bachelor of Science in Information Technology (BSIT)

Pampanga State Agricultural University — Magalang, Pampanga | Sep 2020 – Jun 2024

Completed final-year internship at Servo IT Solutions (Feb–May 2024); retained as a full-time hire immediately following graduation based on performance.
